

Every parent or grandparent should know how and when to administer CPR. When performed correctly, CPR can save a child's life by restoring breathing and circulation until advanced life support can be given by health care providers.

Did you know you can single handedly save a life? Bystander CPR has saved more lives than many realize. Atlantic General Hospital, Shawn and Melanie Hall are holding a **Free Community CPR event on Sunday August 21** to not only help you learn this valuable tool, but to honor their daughter, Sierra. CPR was the key factor in helping Sierra when she collapsed playing lacrosse. Our mission is to educate the community with such a lifesaving tool and during the same process show a little girl that she can make an impact. The event will be held at **The Georgia House Restaurant in Millsboro**. All donations from the event will be going to the American Heart Association in Sierra's name! Classes are being held at 9:30 & 12:30. Classroom size is limited to about 100 people. If you're interested please contact Melanie at melanie@eatgh.com or chuck.hall@intervet.com.
